TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

AMPMODU MTE HEADERS GPL 296

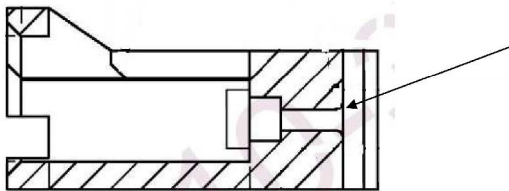

Description of Changes

To satisfy customer demand for the capability of MTE headers to handle RoHS solder temperatures, TE Connectivity has retooled the MTE header product line to use high temperature compatible LCP molding material. These changes will result in the following product changes: 1) Housing material will change from high temperature nylon to LCP. 2) The header housing width will be reduced by 0.005 inches to accommodate the assembly process. 3) In order to consolidate some housing features, the contact cavity configuration will be changed slightly as shown in the attached sketch.
