Subject: PCN#05A-17 – Upgrade of Selected BGA Substrates to Green Materials

Dear Lattice Customers,

Lattice is delighted to provide this 90-day Notification of our intent to convert select BGA products to a Halogen-free material set. This change affects specific BGA packages from assembly-test supplier, Advanced Semiconductor Engineering, Malaysia (ASEM). This change is a continuous improvement and will be implemented on a rolling basis.

Change Description

In response to consumer demand for non-Halogenated IC's, substrate supplier Mitsubishi Gas Chemical (MGC) has announced the discontinuance of Halogenated materials by the end of 2017. Lattice's assembly/test supplier, ASEM, uses MGC products in select BGA substrates and will also be converting to the new non-Halogenated materials.

The substrate core and prepreg dielectric material will change from CCL-HL832/GHPL-830 to CCL-HL832**NX**/GHPL-830**NX**. All compounds are manufactured by MGC. This change will not impact the device form, fit or function.

Note that the new material set combination is already in-use on other Lattice products at ASEM and at other Lattice suppliers. No electrical performance difference has been measured or is expected.

Characterization Data

No difference in electrical test yields was measured on any of the above qual lots. Electrical performance parametrics of speed and power also showed no difference as evidenced by the sample data below.

MXO640E-csBGA100

Parameter	Old Substrate	New Substrate	Comment
Yield	Baseline	Within 0.002 sigma of Baseline	Very nominal
Speed	Baseline	Baseline – 4mA	Slightly lower power
Power	Baseline	Baseline+.3sigma	Slightly faster performance

Sample Support

Lattice considers this change an extremely low risk. Samples of the new BOM are not required. Conversion to these new materials will start 90 days from the date of this Notice. Any order of the affected OPNs from ASEM will eventually transition to the new materials. No action is required (meaning no changes to OPNs, your internal Bills of Material, backlog or orders).

Conversion Timing Summary
