ADVANCE PRODUCT CHANGE NOTIFICATION

APCN: PCN173705A

Date: December 14, 2017

Subject: Planned Qualifications of Fab 25 as an Additional Wafer Fab Site and a New Bill of Materials at J-Devices for Select MCU and Analog Products

To: PHILIP MAILLET
FUTURE
pcn.system2@future.ca

Description of Change:

The purpose of this addendum is to update the affected parts list and provide more details on the top mark change associated with the part number changes.

This is an advance notification, no immediate action on your part is necessary. Once samples are available (see approximate schedule in the attached file), we would appreciate an expeditious qualification.

These changes to select Automotive MCU and Mass Market (MM) MCU products include qualification of Cypress's Fab 25 as an additional Wafer Fab Site, migration from gold to copper wire, introduction of an improved mold compound, and conversion from etched to stamped lead-frames. These changes are not all implemented on all affected parts—the table below groups the number of parts that are affected for each combination of changes.

MPN change	Fab25 xfer	Mold change	Wire change	L/F change	No. of MPN	Group (GR)	Planned PCNs										
							Q417	Q118	Q218	Q318	Q418	Q119	Q219	Q319	Q419		
CY (w/o Logo)	Yes	Yes	Yes	No	6	1	GR1-A										
			No	No	434	2		GR2-A	GR2-B	GR2-C	GR2-D	GR2-E	GR2-F	GR2-G	GR2-H		
	No	Yes	No	No	No	54	3	GR3-A	GR3-B	GR3-C	GR3-D	GR3-E				GR3-F	
				Yes	Yes	86	4		GR4-A								
				No	No	1,048	5	GR5-A	GR5-B								
				No	No	60	6	GR6-A	GR6-B								
				Yes	No	1	7	GR7-A									
				No	No	1,709	8	GR8-A	GR8-B								
total					3,398		6	6	2	2	2	1	1	2	1		

So, for example, a total of 1,048 Marketing Part Numbers (MPNs) representing Group 5 (GR5) will get the marking change (MPN change) and will be assembled with the improved mold compound and copper wires; this group of parts will not transfer to Fab25, nor will there be any change in leadframe. These 1,048 MPNs will be qualified in two tranches, GR5-A and GR5-B, with PCNs going out in Q417 and Q118, respectively.

A new reel format will also be announced separately, which will affect a subset of the devices listed in the table above. Since this does not involve a change in supplier, materials, or dimensions, notification will be done by Product Information Notification (PIN). The purpose of the new reel format is to standardize it to IEC60286-3, which is the standard reel format used by our subcontractor J-Devices.

Marketing part numbers will change from an MB prefix to a CY prefix for 3,398 products. This will include removal of the “F-logo” or “Spansion-logo.”

Marketing part numbers and device marking will not change for 130 products that were previously included in Product Termination Notifications (PTNs) 163704, 171104, 171201 and 172507. The only change for these products will be in the reel format, as described above.

Benefit of Change:

These qualifications will enable Cypress to continue to meet its delivery commitments by having a continued supply from alternate qualified sources.

The primary impetus for this project is to qualify Cypress’s Fab25 in Austin as a second source for these products. At the same time, a subset of these products, depending on the package, are currently not utilizing J-Devices’ standard flow with regards to mold compound, leadframes, and bonding wires.

In order to protect customers from having to qualify the same MPN multiple times, we are consolidating these fab and assembly changes under single PCNs.

Part Numbers Affected: 3,528

See the attached ‘Affected Parts List’ file for a list of all part numbers affected by this change. This file indicates which parts are affected by the Fab 25 qualification, which parts are affected by the new J-Devices BOM qualification and the new part numbers for each part where the number is changing. Additional Marketing Part Numbers by revision change are indicated with ‘*A’ in the attached ‘Affected Parts List’. Note that the dates are subject to change. Once complete, the qualifications will be announced through regular PCNs.

Qualification Status:

Cypress qualification will be complete at the time of each PCN issuance, and samples will also be available at that time.

Sample Status:

Samples will be available at the time that the specific PCN is issued. Qualification samples are not built ahead of time for all affected part numbers. Please contact your local Sales Representative to schedule samples.

Approximate Implementation Date:

Implementation dates will be communicated at the time of each PCN issuance.

Anticipated Impact:

Products fabricated at Fab 25 and/or assembled with the new Bill of Materials (mold compound, leadframe, bonding wires) will be completely compatible with existing product from a functional, parametric and quality performance perspective.

Method of Identification:

Cypress maintains traceability of product to wafer level, including wafer fabrication location, through the lot number marked on the package. New part numbers will be used to distinguish product from Fab 25. The Fab location marking on the part will be used to reflect the Fab location. The part marking will change to show the new part number.

Response Required:

This is an information only announcement. No response is required.

For additional information regarding this change, contact your local sales representative or contact the PCN Administrator at pcn_adm@cypress.com.

Sincerely,

Cypress PCN Administration
