**RE: Communication Letter of Production Transfer for Acquired ON Semiconductor Automotive TVS Diodes, status updates and action reminding**

To our valued customers,

On August 29, 2016, Littelfuse completed the acquisition of select ON Semiconductor product lines. The acquired product lines include TVS Diodes, Thyristors, and IGBT's for ignition applications as well as all relevant intellectual property.

As agreed in the Transition Services Agreement (TSA), ON Semiconductor has been producing and will continue to produce all automotive grade TVS diodes during the transition period. Meanwhile Littelfuse is working very closely with ON Semiconductor for the production transfer into Littelfuse manufacturing site based in Wuxi, China.

In March.27<sup>th</sup> 2018 Littelfuse has announced the PCN of Acquired Automotive TVS Diodes Production Transfer SMA(DO-214AC) and SMC(DO-214AB), then in May.07<sup>th</sup> 2018 we announce the PCN of Acquired Automotive TVS Diodes Production Transfer SMB (DO-214AA) and SMF (SOD123).

In these 2 PCNs we agreed 180 days notification period, now we are going to start the mass production from Littelfuse Wuxi plant in December 2018 for all the product families which have been covered by these 2 PCNs.

To ensure a smooth transition and avoid any delivery interruptions, we are providing this communication letter with key information about the production transfer and ask that you to contact Littelfuse local Sales teams or Customer Service Team.

**New orders with CRD(Customer Request Date) in Feb 2019, please place order to Wuxi plant (WX1).**

**Existing backlog (open orders) that is manufactured in ON Semi plant, please contact Littelfuse Sales and Customer Service Team to decide if we can switch to new production site in Wuxi.**

**If any customer does have difficulty to finish the PCN approval within Nov 2018 please do communicate to our local Sales and Customer Service Team for the Last Time Buy to ensure the deliveries to fulfill THE demand before the PCN is approved.**

**With this production transfer Littelfuse will significantly improve the capacity and lead time to fulfill the market demand with much better service .**

If you have any other questions or concerns, please contact Littelfuse@ local sales office, or Customer Service Team, or Charlie Cai ([ccai@littelfuse.com](mailto:ccai@littelfuse.com)) Global Product Manager Automotive TVS Diodes within Nov. 2018.

We value your business and look forward to assisting you whenever possible.

Best Regards,  
Charlie Cai  
Product Manager Automotive and Hi-Rel TVS
