Subject: Package Quantity Change SMD 2835 Products

Dear Customer,

This Engineering Change Notice (ECN) applies to the quantity of Bridgelux SMD2835 products per reel shipped to customers and distribution partners.

Currently the 2835 products are packaged in three different reel quantities. Depending on the part number ordered, current reel sizes are 5,000 units per reel or 17,000 units per reel. Where the reel size is 5,000 units, 5 reels for a total of 25K parts are included per moisture barrier bag. Where the reel size is 17,000 units, currently one reel is included per moisture barrier bag. In order to improve the productivity of assembly process, Bridgelux is aligning the standard reel quantities for all 2835 LED packages to 17,000 units per reel and one reel per moisture barrier bag.

If during production there is an insufficient quantity to populate a full 17,000 unit reel with a single bin code, Bridgelux may package the 2835 LEDs in supplemental reels containing 4,250 units with one reel of 4,250 units per moisture barrier bag. As a result, you may receive a mixture of both 17,000 unit reels and 4,250 unit reels in future shipments.

Affected Products:

Part Numbers	Current Packaging	New Packaging
BXEN-xxE-11L-37A	17,000 units per reel 1 reel of 17,000 units per moisture barrier bag	17,000 units per reel 1 reel of 17,000 units per moisture barrier bag Supplemental packaging of 4,250 units per reel with one reel of 4,250 units per moisture barrier bag

This new packaging will take effect with date code 1920, the week of May 3rd 2020. For a period of time, expected to last no more than 3 months, you may receive a mix of the current packaging and new packaging quantities as we work to deplete existing inventory already packaged on reels. If you have any questions regarding this change notice, please contact your Bridgelux sales representative.

Sincerely,

Jason Posselt
VP Global Marketing
Bridgelux, Inc.
