## Advanced notice of Molding Compound change for various Discrete Power & IC devices

To our valued customers,

This is an advisory notice of an upcoming change of the Epoxy Molding Compound (EMC) material used in various discrete power and IC packages.

As you maybe aware, Samsung SDI has decided to exit the EMC material business and as a result we are well advanced in qualifying new materials from alternative vendors. In most instances we are using materials that we have already qualified for similar applications and as such we expecting this to be a relatively low risk exercise.

As this affects several different technology / package combinations and will result in a number of individual PCNs, we are providing this advanced overview such that we can work with you as far as possible to minimise the impact and disruption to your business of this upcoming change.

The following table shows a high level view of when we expect to release each PCN, by package and technology.

	PACKAGE TYPE									
	ISOPLUS220	ISOPLUS247	ISOPLUS264	I4PAK	SMPD	TO252	TO220FP	TO264	TO3P	TO263-7L
Thyristor / Diode	Q3	Q2	Q3	Q2	Q4	Q2	Q3	Q4	Q2	Q4
MOSFET / IGBT		Q2,Q4	Q3,Q4	Q2,Q4	Q4	Q3	Q3	Q4	Q3	Q4
IC / SSR			Q4	Q4						

Appendix to this notice you will find a detailed list of part numbers affected (an electronic copy is available on request).

Individual PCNs will follow in the usual manner and we will do our utmost to release these in logical, concise groups.

In the first instance, we would kindly ask you to review the information and address any questions and any specific individual needs to your usual Sales contact.

Thank you and kind Regards,

Ashley Golland  
Director, Product Management, Medium and High power  
Semiconductor Business Unit
