## 2 Type of change

- Modified packaging label
- Improved identification: product configuration code on the label

## 3 Detailed description of change

The following table describes the modifications applied to the new packaging label. All listed product types share the same packaging label design. To better visualize the modifications, colours and numbers were added to this chapter to cluster information into sections (the colours and white numbers are therefore not part of the new label layout). Some old and new label have been added as an example for visualization.

**Product identification section:** To improve readability, all the information concerning product identification in this group is clustered. Furthermore, some of the content/ text of the label is subjected to following changes (see highlighted red areas on the labels of the following page):

- Product Type: Not changed.
- Configuration Code: Has been added.
- Part Description: Has been added.

→ For details on text/ content that has been changed please see list attached to this PCN.

**Product conformity section:** Identical information, slightly rearranged. CE and SCHURTER address added.

2

**Product logistics section:** Identical information, slightly rearranged.

3

**Product approval section:** Not featured

4

**Product rating section:** Not featured

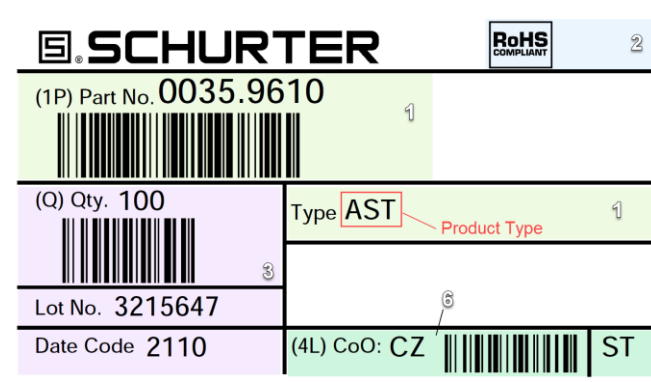

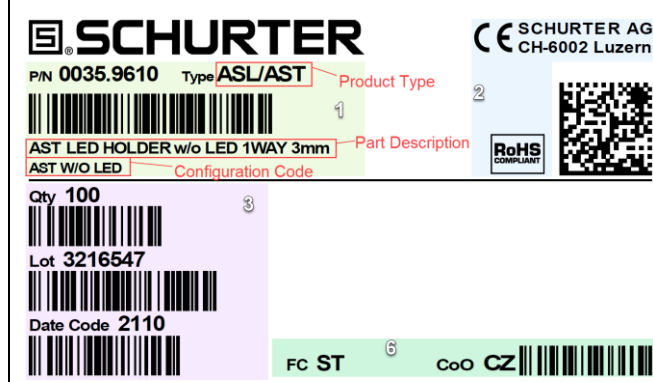

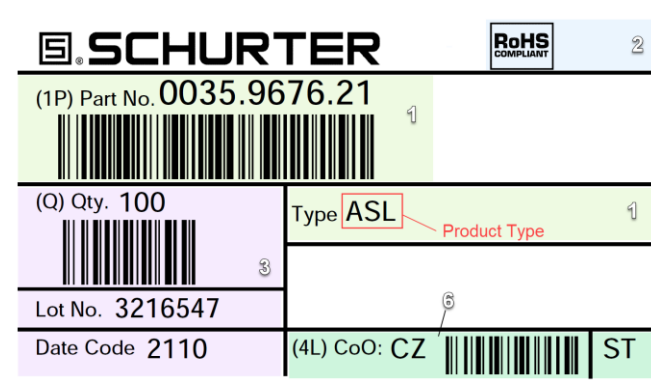

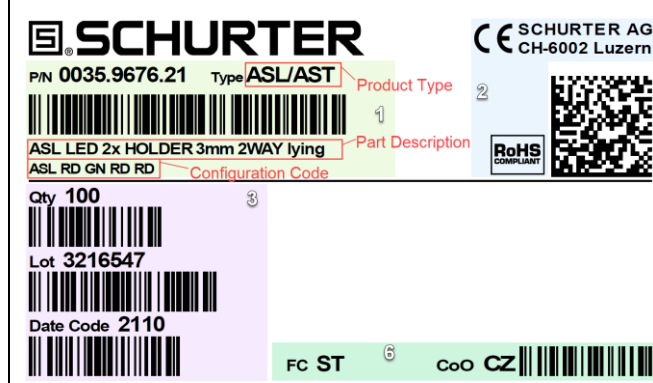

5

**Origin information section:** Identical information, slightly rearranged. Factory Code identifier "FC" added.
