2. Change description

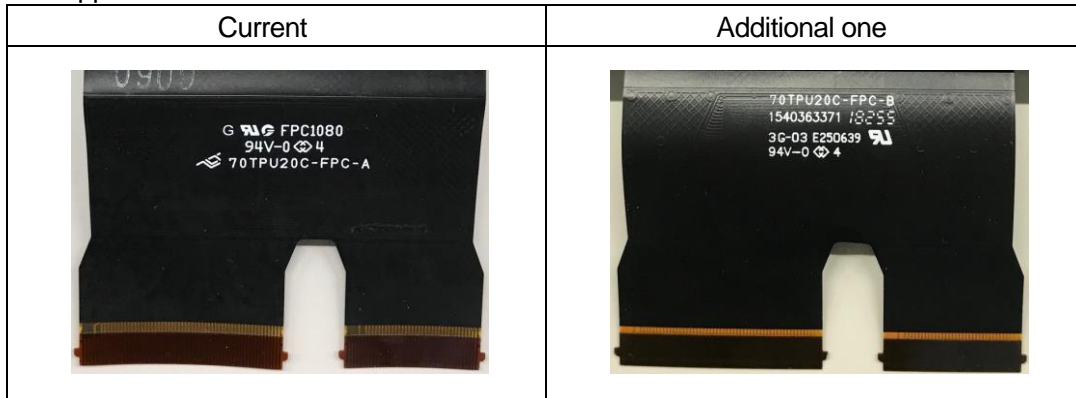

In order to get stable procurement of FPC for touch panel, FPC made by maker B will be added.

Current : FPC made by maker A
 After change : FPC made by maker A and FPC made by maker B

FPC made by maker A and FPC made by maker B are compatible one except for the printing on the FPC and the color of the terminal reinforcement plate. There is no difference in the performance of FPCs in terms of size, pin connection, pin pitch, material, flame retardance and so on. Therefore you can use same touch panel controller as current one.

FPC made by maker B has already been applied to other mass production PCAP products.

FPC appearance

There are no optical or electrical specifications change and no changes in product reliability. And there will be no influence on RoHS compliance.

3. MP Schedule

The change will be applied from May 2021 production.

4. Product revision

No product revision will be changed. The change will be applied as a running change.

In case there are any questions, please feel free to contact sales or sales representative of TMJ.
