 MICROCHIP

Product Change Notification / SYST-14ZHVK248

Date:

20-Sep-2021

Product Category:

Microprocessors

PCN Type:

Silicon Die Revision

Notification Subject:

ERRATA - SAM9X60 Device Silicon Errata and Data Sheet Clarification Revision

Affected CPNs:

SYST-14ZHVK248_Affected_CPN_09202021.pdf
SYST-14ZHVK248_Affected_CPN_09202021.csv

Notification Text:

SYST-14ZHVK248

Microchip has released a new Product Documents for the SAM9X60 Device Silicon Errata and Data Sheet Clarification of devices. If you are using one of these devices please read the document located at SAM9X60 Device Silicon Errata and Data Sheet Clarification.

Notification Status: Final

Description of Change: Revision includes:
1. Updated SAM9X60 Silicon Device Identification table with additional chip ID (0x819B35A2)
2. Added OTPC Dependency to Main RC Oscillator in 8. Data Sheet Clarifications

Impacts to Data Sheet: None

Reason for Change: To Improve Productivity

Change Implementation Status: Complete

Estimated First Ship Date:

CPN	Estimated First Ship Date

SAM9X60-V/DWB	
SAM9X60-V/DWBVAO	
SAM9X60T-V/DWB	October 15, 2021
SAM9X60T-V/DWBVAO	
SAM9X60D6K-I/4GB	
SAM9X60D6KT-I/4GB	
SAM9X60D5M-I/4FB	February 28, 2022
SAM9X60D5MT-I/4FB	
SAM9X60D1G-I/4FB	January 15, 2022
SAM9X60D1GT-I/4FB	

NOTE: Please be advised that after the estimated first ship date customers may receive pre and post change parts.

Markings to Distinguish Revised from Unrevised Devices: Traceability Code

SAM9X60 Device Silicon Errata and Data Sheet Clarification

Please contact your local Microchip sales office with questions or concerns regarding this notification.

Terms and Conditions:

If you wish to receive Microchip PCNs via email please register for our PCN email service at our PCN home page select register then fill in the required fields. You will find instructions about registering for Microchips PCN email service in the PCN FAQ section.

If you wish to change your PCN profile, including opt out, please go to the PCN home page select login and sign into your myMicrochip account. Select a profile option from the left navigation bar and make the applicable selections.

SAM9X60 Device

SAM9X60 Device Silicon Errata and Data Sheet Clarification

SAM9X60 Device

The SAM9X60 device that you have received conforms functionally to the current Device Data Sheet (DS60001579), except for the anomalies described in this document.

The silicon issues discussed in the following pages are for silicon revisions with the Device and Revision IDs listed in the following table. The silicon issues are summarized in 1. Silicon Issue Summary.

Note: This document summarizes all silicon errata issues from all revisions of silicon, previous as well as current.

Data Sheet clarifications and corrections (if applicable) are located in 8. Data Sheet Clarifications, following the discussion of silicon issues.

The Device and Revision ID values for the SAM9X60 silicon device are shown in the following table.

Table 1. SAM9X60 Silicon Device Identification

Part Number	Device Identification	
	CHIPID_CIDR[31:0]	CHIPID_EXID[31:0]
SAM9X60-V/DWB	0x819B35A1	0x00000000
	0x819B35A2	

Note: Refer to the "Chip Identifier" and "Product Identification System" sections in the current device data sheet (DS60001579) for detailed information on chip identification and version for your specific device.

Table of Contents

1. Silicon Issue Summary

Table 1-1. Silicon Issue Summary

Module	Item/Feature	Summary	Affected Silicon Revisions		
			A		
ROM Code	Secure Boot Mode: AES-RSA X.509 Certificate Serial Number Length Limit	The length of serial numbers is limited to 16 bytes by the ROM code.	X		
System Controller	System Controller Write Protection Status Register (SYSC_WPSR) Limitation	Write access violation is not reported by SYSC_WPSR.	X		
OTPC	OTPC Limited Number of Packets	The number of packets is limited to 2.	X		
	OTPC Restricted Operating Range in Write Mode	Write operations cannot be performed over the full temperature and VDDANA ranges.	X		
	OTPC Wrong Default Configuration	The default configuration cannot be used to access the OTP memory in Write mode.	X		
PMC	ULP1 Mode Entry Procedure	Spurious exit from ULP1 mode	X		
SMC	Register Write Protection Not Effective on SMC_OCMS Register	The register write protection is not effective on the SMC_OCMS register.	X		
FLEXCOM	FLEXCOM Sniffer Mode	Peripheral TWI*n+1* cannot be configured to analyze peripheral TWI*n*.	X		

2.   ROM Code

2.1   Secure Boot Mode: AES-RSA X.509 Certificate Serial Number Length Limit

According to the standard RFC 5280 "Internet X.509 Public Key Infrastructure Certificate" section 4.1.2.2, the maximum length for serial numbers in X.509 certificates is 20 bytes.

When parsing the certificate chain in AES-RSA Secure Boot mode, the maximum serial number length allowed by the ROM code is 16 bytes.

Work Around
To use AES-RSA Secure Boot mode, do not use X.509 certificates with a serial number length higher than 16 bytes.

Affected Silicon Revisions

A							
X							

3. System Controller Write Protection (SYSCWP)

3.1 System Controller Write Protection Status Register (SYSC_WPSR) Limitation

The status register SYSC_WPSR does not set the write access violation status flag for write-protected registers of RTC, RTT and WDT peripherals when the bit WPEN is set in SYSC_WPMR for these peripherals. However, the write protection mechanism is active.

Work Around

None

Affected Silicon Revisions

A							
X							

4. OTP Controller (OTPC)

4.1 OTPC Limited Number of Packets

The number of OTP packets allowed to be written in the user area, in addition to those necessary to configure the ROM code boot features, is limited to 2. The maximum size of the payload for each packet is 8192 bits.

Work Around
None

Affected Silicon Revisions

A							
X							

4.2 OTPC Restricted Operating Range in Write Mode

The write operations in the OTPC cannot be performed over the full temperature and VDDANA power supply ranges specified.

Work Around
The write operations in the OTPC are restricted to the following ambient temperature and VDDANA power supply ranges:

- T_A = [0°C to 50°C]
- VDDANA = [3.15V to 3.45V]

Affected Silicon Revisions

A							
X							

4.3 OTPC Wrong Default Configuration

The default configuration of the OTPC cannot be used to access the OTP memory in Write mode.

Work Around
Prior to any write operation in the OTPC, the OTPC must be configured using the following code. This operation needs to be performed only once before the first write operation and whenever the peripheral reset (signal periph_nreset) is asserted.

```
#define ARRAY_SIZE(a) (sizeof(a) / sizeof((a)[0]))

/*
 * writing one word lasts 350us
 * the timeout was chosen to be enough for writing 10 words  **/
#define TIMEOUT 50000C
#define OTPC_0    (0x1u << 0)
#define OTPC_1    16
#define OTPC_2    (0xffffu << OTPC_1)
#define OTPC_3    (0x4391u << OTPC_1)

static void otp_sam9x60_fixup(void)
{
        static const uint32_t fixup0[4] = {0x04194801, 0x01000000, 0x00000008, 0x00000000};
        static const uint32_t fixup1[4] = {0xfb164801, 0x4c017d12, 0x02120e01, 0x00004000};
```

```
        __IO uint32_t *OTPC_4   = (__IO uint32_t *)((uint8_t *)OTPC + 0x090);
        __IO uint32_t *OTPC_5 = (__IO uint32_t *)((uint8_t *)OTPC + 0x0A0);
        __IO uint32_t *OTPC_6 = (__IO uint32_t *)((uint8_t *)OTPC + 0x0B0);
        uint32_t timeout;
        int i;

        timeout = TIMEOUT;
        *OTPC_4 = OTPC_0 | OTPC_3;
        while (!(OTPC->OTPC_SR & OTPC_SR_UNLOCK) && --timeout > 0);

        for (i = 0; i < ARRAY_SIZE(fixup0); i++)
                OTPC_5[i] = fixup0[i];

        for (i = 0; i < ARRAY_SIZE(fixup1); i++)
                OTPC_6[i] = fixup1[i];

        timeout = TIMEOUT;
        *OTPC_4 = OTPC_3;
        while ((OTPC->OTPC_SR & OTPC_SR_UNLOCK) && --timeout > 0); }
```

Affected Silicon Revisions

A							
X							

5.   Power Management Controller (PMC)

5.1   ULP1 Mode Entry Procedure

If one or more read or write accesses to the PMC user interface follow the last instruction to enter ULP1 mode (set CKGR_MOR.ULP1), the ULP1 mode may be exited immediately after the entry.

Work Around

Add two dummy read accesses outside of the PMC user interface just after setting the CKGR_MOR.ULP1 bit.

Affected Silicon Revisions

A							
X							

6. Static Memory Controller (SMC)

6.1 Register Write Protection Not Effective on SMC_OCMS Register

The register SMC_OCMS is not write-protected when the bit WPEN is set in SMC_WPMR.

Work Around
None

Affected Silicon Revisions

A							
X							

7.   Flexible Serial Communication Controller (FLEXCOM)

7.1   FLEXCOM Sniffer Mode

When using FLEXCOM in Sniffer mode, the peripheral TWI*n+1* cannot be configured to analyze the peripheral TWI*n* (n being the instance index of the TWI) in a full transparent mode via predefined internal connections between TWI instances.

Work Around

Configure TWI*n* to analyze TWI*n+1*.
Note: When n=12 (FLEXCOM12), n+1 means 0 (FLEXCOM0).

Affected Silicon Revisions

A							
X							

8. Data Sheet Clarifications

8.1 OTP Controller (OTPC)

8.1.1 OTPC Dependency to Main RC Oscillator

The main RC oscillator must be turned on prior to reading or writing the OTP memory.

9.   Revision History

9.1   DS80000846D - 09/2021

Updated SAM9X60 Silicon Device Identification table with additional chip ID

Added OTPC Dependency to Main RC Oscillator in 8. Data Sheet Clarifications

9.2   DS80000846C - 09/2020

Updated 4.1 OTPC Limited Number of Packets

Added 2.1 Secure Boot Mode: AES-RSA X.509 Certificate Serial Number Length Limit

9.3   DS80000846B - 02/2020

Added 7. Flexible Serial Communication Controller (FLEXCOM)

8. Data Sheet Clarifications: removed "EBI Controls in Special Function Registers (SFR)"

9.4   DS80000846A - 10/2019

First issue.

The Microchip Website

Microchip provides online support via our website at www.microchip.com/. This website is used to make files and information easily available to customers. Some of the content available includes:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip design partner program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

Product Change Notification Service

Microchip's product change notification service helps keep customers current on Microchip products. Subscribers will receive email notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, go to www.microchip.com/pcn and follow the registration instructions.

Customer Support

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Embedded Solutions Engineer (ESE)
- Technical Support

Customers should contact their distributor, representative or ESE for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in this document.

Technical support is available through the website at: www.microchip.com/support

Microchip Devices Code Protection Feature

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods being used in attempts to breach the code protection features of the Microchip devices. We believe that these methods require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Attempts to breach these code protection features, most likely, cannot be accomplished without violating Microchip's intellectual property rights.
- Microchip is willing to work with any customer who is concerned about the integrity of its code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not mean that we are guaranteeing the product is "unbreakable." Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.
