To: Bussmann series fuse block customers
Subject: End-of-life notification for legacy Class T fuse blocks

Dear valued customer:

In an effort to streamline product delivery, we have reevaluated our Bussmann series Class T fuse blocks and will be making product updates moving forward. We know that Class T fuse blocks have been a staple of our portfolio for many years and understand that these product updates will require design changes to accommodate their new footprint and mounting patterns.

Effective April 1, we will begin a 6-month transition to the new parts. During that time, the current Class T fuse blocks will continue to be available for new orders, and the new blocks will also be available. At the end of the 6-month period, or as of October 1, the current Class T fuse blocks will be discontinued, and last time buys will need to be in the system.
