<p>TMJ Product Change Notice PCN Tracking Number: TMJ-PP-1799</p>

Subject: Change of Signal processing board for NL products

This change relates to many products, for which the implementation is structured into different groups. This document refers to Group 3.

1. Applicable products, MP Schedule and Product revision

Group	Size	Resolu tion	Type name	Start of production Note1	Product revision Note2	
					Current	After change
3	6.5	VGA	NL6448BC20-30	October 2023	D	Note3

Note1: There might be some timing change due to material stock situation.

Note2: Example of name plate label

Name plate label (Example)

Product revision

Note3: It will be informed later.

2. Change description

(1) Product change

Due to discontinuation of signal processing boards, we will develop new signal processing boards. Design of the current signal processing boards are old and many mounted components are not current mainstream. Therefore, we will change several commodity components to mainstream. But the following major components will not be changed.

No change from current one:

- Timing controller IC
- Interface connector (Type name and mounting position)

There will be no influence on environmental compliance like UL and RoHS compliance.

(2) Change of delivery specifications

Fuse type, manufacturer, rating, and fusing current will be changed. Details of fuse specifications will be informed later.

No contents of delivery specifications will be changed except for specifications of fuse.

In case there are any questions, please feel free to contact sales or sales representative of TMJ.

A handwritten signature in black ink that reads 'R. Kawashima'.
