## Ceramic Capacitor Supply Status Update

Dear US Distribution Partners and Customers,

Thank you for your continued business and support.

Upon the conclusion of the 2022 calendar year, we would like to take a moment to update you on the current status of TDK's Ceramic Capacitor business and what we are doing to prepare for 2023 and beyond.

TDK continues to see an overwhelming global demand increase of ceramic capacitors fueled by multiple market segments. In an attempt to reduce our backlog and lead times to something more manageable, TDK is implementing the following simultaneous actions which are critical to the stabilization of our supply chain:

1. New / additional equipment at existing factories
2. Expanding diversity of output at all facilities to support key bottleneck parts
3. Construction of new MLCC manufacturing plant with estimated completion date of Q1 2024

The sum of these actions should increase our overall capacity by over 90%; however, in order to reflect today's limited visibility, we will continue adjusting acknowledgement dates to as late as 12/31/2024. This will not affect your current place in line (shipments will continue on an allocation basis), but it will help TDK to more easily manage the backlog and hopefully the allocation calls for all parties involved. Please note, this is only a temporary measure and once the situation improves, we will re-adjust / pull in dates accordingly.

Additionally, we have provided a list of our most troublesome parts below and request your understanding by limiting new orders to the minimum required to avoid further backlog build up. There could be additional items impacted considering the current market conditions; however, we believe the following products to be the most difficult.

In spite of the overwhelming challenges, we remain committed to serving our mutual customers to the best of our ability. Our focus is to work with you to minimize, and whenever possible avoid any undue hardships. Thank you for your consideration of TDK!

TDK Corporation of America

Ceramic Capacitors Business Group
