Information Note

Change of marking on IEC inlet filters

To become more independent of suppliers or their manufacturing tools and thus achieve better availability, the marking on the fuse holder of the EPCOS IEC inlet filters of the B8477* series will no longer be specified as a symbol in the data sheet. Consequently, the fuse symbol actually printed on the fuse holder of the filter can vary from the current version or will disappear. This has no effects on specified mechanical and electrical properties of the affected products.
