INDUCTION HEATING COOKER: OVERVIEW

Induction Heat (IH) cooking is gaining popularity due to its low power requirements and safety advantages. IH cooking models capable of accommodating all types of metallics are now available and are ideal for the "all electric" home. These appliances require high-performance MCUs to control the heating process and need advanced controls such as touch displays which are now rapidly becoming the standard, as they are easy to use and easy to clean.

Key Features:

- The RX23T is designed for complex inverter control algorithms for IH control and inverter heaters
- The RX130 solution provides a user interface and high performance touch interface
- Enables wireless connectivity for smart control systems

## RX23T: INDUSTRIAL AND MOTOR CONTROL MCU

*Industrial applications MCU series within the Renesas RX family*

### Features
- RX microcontrollers with RXv2 core
- Enhanced security
- Single precision floating point
- Enhanced DSP functions
- 64k/128k KB 0 wait-state FLASH
- RAM 640 KB
- Data Flash 32 KB
- 1uS ADC with 3 simultaneous S/H
- Built-in analog comparators (3 ch)
- Safety functions

### Benefits
- Compact code size
- Low cost / high performance for control applications.
  - Fast sampling ADC for sensors
  - Fast math processing
  - BLDC Algorithms available
  - In-circuit scope for motor control

### Applications
- Motor control
  - HVAC, fan control, inverter control
  - General Industrial

### Typical application and key performances

- **Motor Control Kit**
- **Renesas Motor Workbench 2.0: Motor Control Development Tool 2.0**
- **Chip Block**
**ISL9005A: LDO WITH LOW ISUPPLY, HIGH PSRR**

*High performance 300mA LDO*

| • 300mA high performance LDO  
  • Very low quiescent current: 50µA  
  • Low output noise: typically 45µVRMS @ 100µA (1.5V)  
  • ±1.8% accuracy over all operating conditions  
  • High PSRR: 75dB @ 1kHz  
  • Low dropout voltage: typically 200mV @ 300mA | • Very low quiescent current: 50µA  
  • Excellent load regulation: <0.1% voltage change across full range of load current  
  • Soft-start to limit input current surge during enable  
  • Wide input voltage capability: 2.3V to 6.5V | • Handheld devices, including medical handhelds  
  • PDAs, cell phones and smart phones  
  • Portable instruments, MP3 players |

# ISL80505: SINGLE OUTPUT LOW DROPOUT REGULATOR

## High performance 500mA LDO

### Features
- ±1.8% VOUT accuracy guaranteed over line, load, and TJ = -40°C to +125°C
- Very low 45mV dropout voltage at VOUT = 2.5V
- Stable with a 4.7μF output ceramic capacitor
- Very fast transient response
- Programmable output soft-start time
- Excellent PSRR over wide frequency range
- Current limit protection
- Thermal shutdown function

### Benefits
- A submicron BiCMOS process is utilized for this product family to deliver the best-in-class analog performance and overall value.
- State-of-the-art internal compensation achieves a very fast load transient response and excellent PSRR.

### Applications
- Noise sensitive instrumentation systems
- Post regulation of switched mode power supplies
- Industrial systems
- Medical equipment
- Telecommunications and networking equipment
- Servers
- Hard disk drives (HD/HDD)
