

# Future Electronics Grand Rapids Tech Day 2019

Zikomo Smith : Area Sales Manager  
Angela Mercurio: Area Sales Manager  
Allied Enterprises

**SENSIRION**  
THE SENSOR COMPANY

# Pioneers in Sensor Technology

# Solving Complex Problems Everywhere

Providing antifogging, engine and climate control to approximately **one in three cars** manufactured worldwide.

Reliable real-time monitoring of gas consumption for **more than 1 million** households.

Monitoring the breathing of **more than 10 million** patients in hospitals and at home.

High precision monitoring of temperature and air quality for **millions** of households.

# Our Growth Drivers

## Energy Efficiency

- Scarcity of resources
- Governmental and societal initiatives

## Quality of Life & Healthcare

- Economic development
- Increasing awareness around health, safety, comfort

## Digitalization, Automation, Productivity Increase

- Digitalization and automation
- Technological advancements
- Connectivity, IoT

Automotive

Medical

Industrial

Consumer

Sensirion's sensor solutions are critical for many applications across these growth drivers.

# Sensirion RH/T Sensor Portfolio

## SHTC3

- Low-power, battery driven device
- SHTC1 Customer uses LDO & level-shifter (cost saving of 10-20 cent)
- High price pressure on SHT30
- @ 1.8V: Higher accuracy

## SHTC1

- Customer needs 1.8 V and does not need higher accuracy (there is no EOL planned for the SHTC1)

## SHTW2

- Customer needs 1.8 V and needs/is able to handle the very small size
- Extreme price pressure

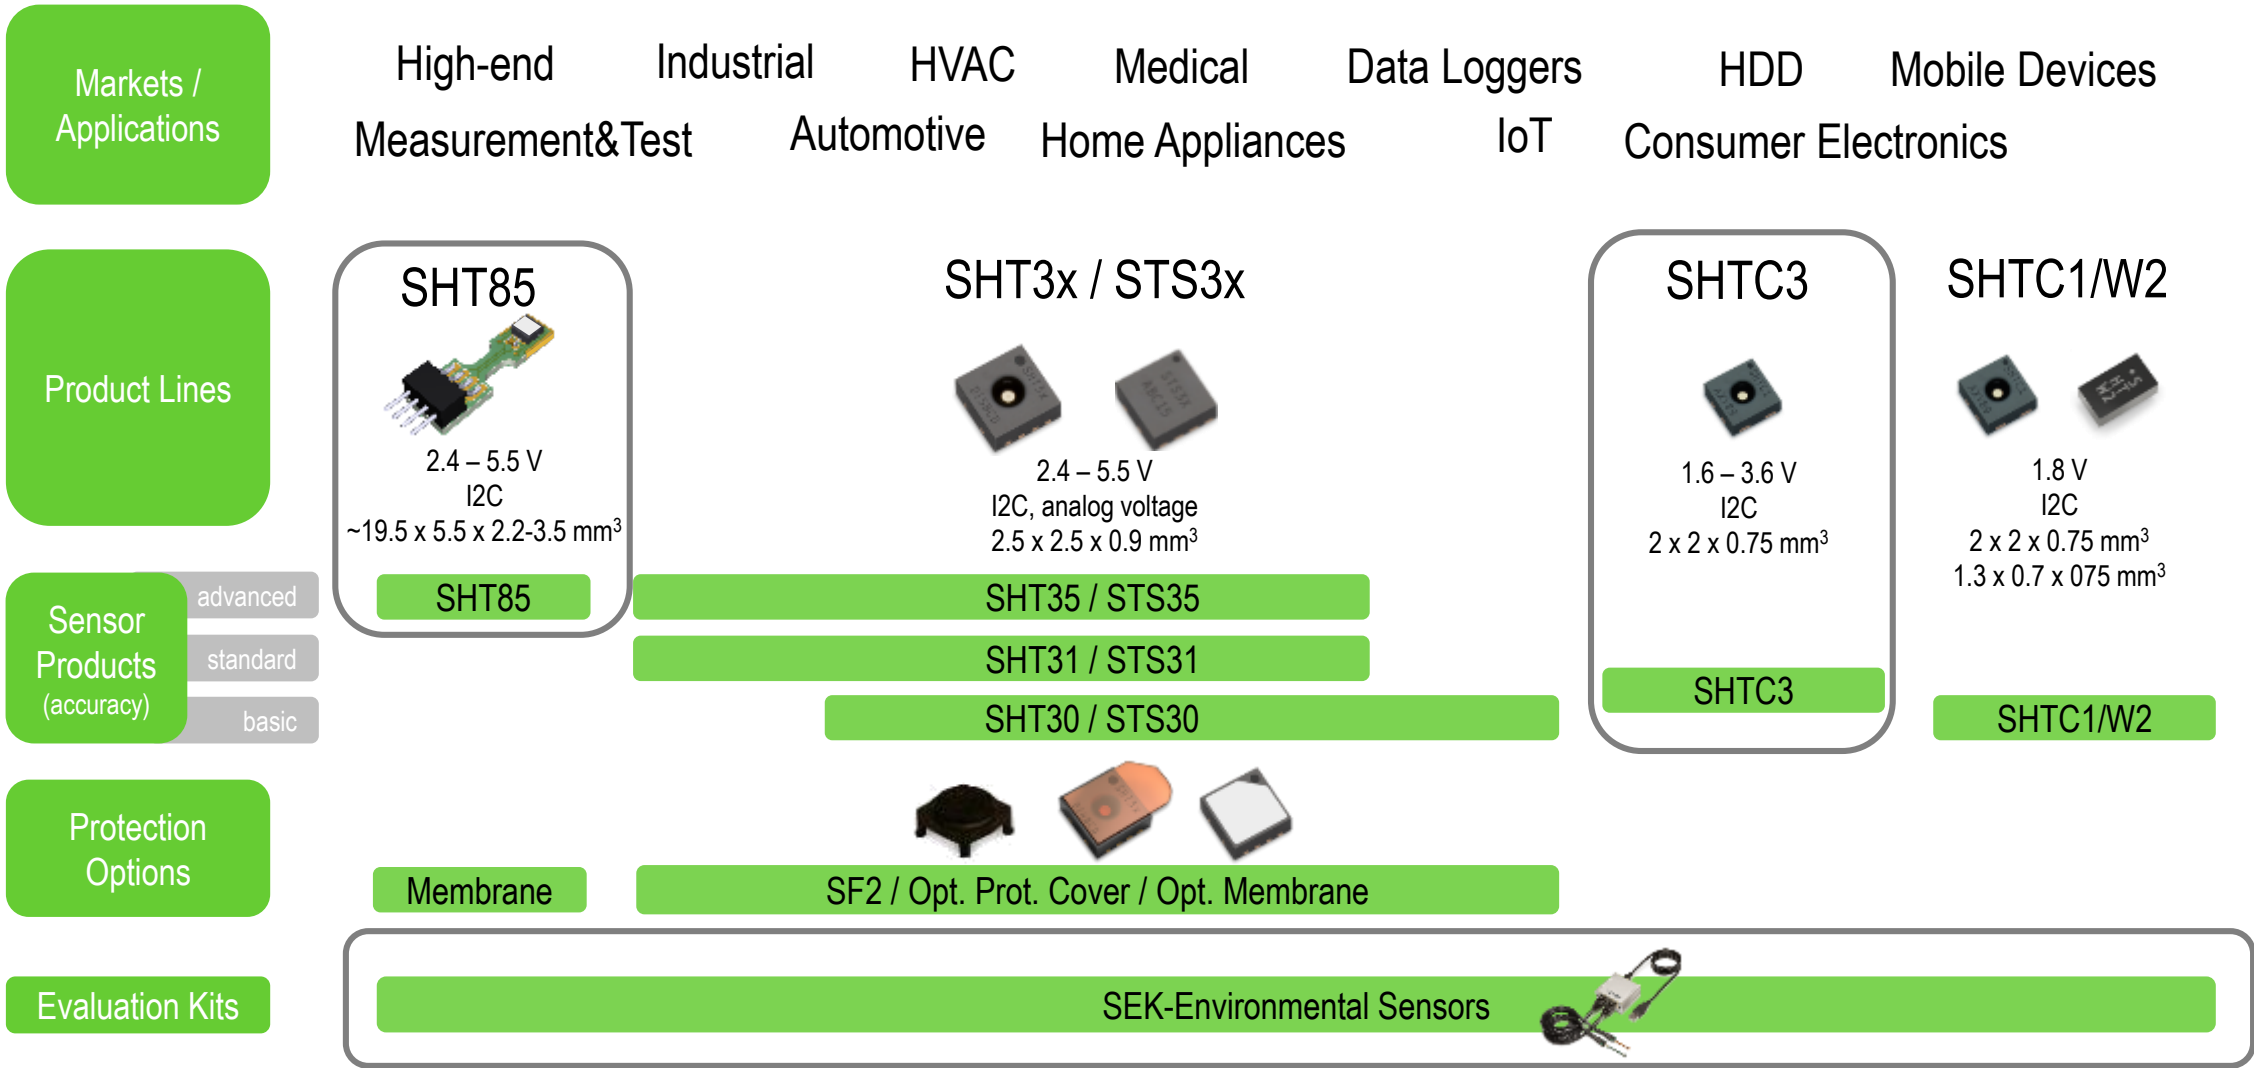

## SHT3x

- Customer needs more features or filter membrane/protective cover
- Customer needs >3.6V

# 3<sup>rd</sup> Generation RH/T Product Portfolio

# Question 1

What year was Sensirion founded ?

# Indoor Air Quality: Source and Impact of CO<sub>2</sub>

Humans increase CO<sub>2</sub> concentration in confined spaces

Indoor Air Quality strongly correlates with CO<sub>2</sub> concentration

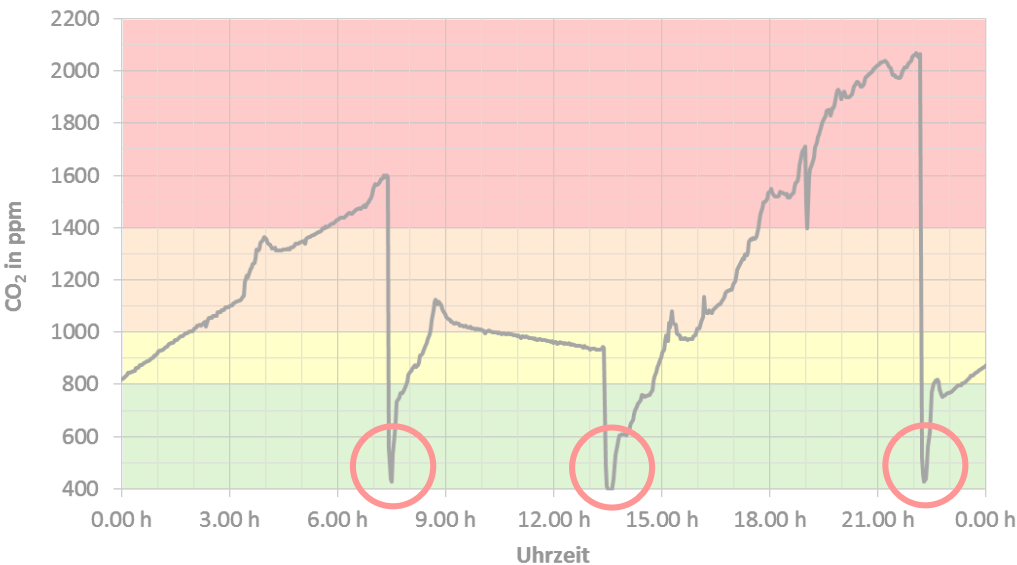

High CO<sub>2</sub> levels cause drowsiness, reduced concentrations and headaches

# Typical CO<sub>2</sub> Concentration and Policy Standards

## CO<sub>2</sub> concentration profile in an occupied room

○ Ventilation Event

## 2007 European Standard EN 13779

Indoor air quality can be categorised by CO<sub>2</sub> concentration. CO<sub>2</sub> is a good indicator for the emission of human bioeffluents (...) for occupied rooms, where smoking is not allowed and pollution is caused mainly by human metabolism.

Indoor air quality Category	Description	CO <sub>2</sub> -level above level of outdoor air [ppm]
IDA 1	High indoor air quality	< 400
IDA 2	Medium indoor air quality	400 – 600
IDA 3	Moderate indoor air quality	600 – 1000
IDA 4	Low indoor air quality	> 1000

# Indoor CO<sub>2</sub> Sensing: Motivation

## Demand Controlled Ventilation (DCV)

- Use CO<sub>2</sub> sensor as a trigger to activate ventilation
- Ensure well-being, health and productivity
- Increase energy efficiency of buildings

## Indoor Air Quality Monitoring (IAQ)

- Monitoring of CO<sub>2</sub> in indoor environments
- Show the customer that air quality is good
- Educate the customer to open a window in case of high CO<sub>2</sub> concentrations

# Sensirion SCD30 - New NDIR combo sensor: CO<sub>2</sub> + RH + Temp

# Sensirion SCD30 - New combo sensor: CO<sub>2</sub> + RH + Temp

## Effects on Humans -

- Mood swings and anxiety
- Nausea
- Headache
- Lathargy and drowsiness
- Decreased cognitive abilities from Workers in Office Buildings @ CO<sub>2</sub> concentrations >750ppm

## Publications and Regulations

- *California Title 24 – Demand controlled ventilation to maintain CO<sub>2</sub> <600ppm*

<http://www.energy.ca.gov/2015publications/CEC-400-2015-037/CEC-400-2015-037-CMF.pdf>

- Environmental Health Perspectives

<https://ehp.niehs.nih.gov/15-10037/>

# SCD30 – NDIR based CO2 sensor with RH + T on board

- Fully calibrated digital sensor > Minimize design efforts, allow fast design cycles
- Low power > Energy efficient

75mA when the light source is turned on [20% duty cycle for 2s sampling]

Avg. power consumption: 17.5mA for 0.5Hz; 10mA for 0.1Hz.

- Accurate for 0-10,000ppm. > Reliability

30ppm + 3% relative error

- Integrated RH and T. Active temperature compensation. > Complete and robust solution for HVAC and building control

- Dual channel principle to offset aging/drift affects of the light source > Long term stability 15 years
- Field calibration FRC + ASC > Very low device to device variation
- Thinnest package > Attractive for wall mounts and other IAQ applications

- CMOSense technology > repeatable and low cost

# Sensirion SPS30

## Particulate Matter (PM) Sensor Module for Air Quality Monitoring Applications

- Particle size mass concentration: *PM1, PM2.5, PM4, PM10*
- Particle size number concentration: *PM0.5, PM1, PM2.5, PM4, PM10*
- Mass concentration range: 0-1000  $\mu\text{g}/\text{m}^3$
- Resolution: 1  $\mu\text{g}/\text{m}^3$
- Accuracy:  
 $\pm 10 \mu\text{g}/\text{m}^3$  @ 0 to 100  $\mu\text{g}/\text{m}^3$   
 $\pm 10 \%$  @ 100 to 1000  $\mu\text{g}/\text{m}^3$
- Supply voltage: 5 V
- Interface: UART, I<sup>2</sup>C
- Operating temperature: -10 to 60 °C
- Dimensions: 40.6 x 40.6 x 12.2 mm<sup>3</sup>
- Lifetime and long-term stability: > 8 years @ 24h/day operation

**SPS Video**

# What are the important features of Sensirion's SPS30?

- Reliability – Long term stability

- Binning – Particle distribution

**Laser vs. LED**

- Applications
  - Air purifiers
  - HVAC equipment
  - Air conditioners
  - Air exchangers
  - IAQ devices/monitors
  - Smoke/fire detection
  - Dust monitoring

# Thermal Flow Measurement

- Highest product performance in terms of speed, reliability and accuracy
- Market leader in medical applications

# Flow Sensors

- Excellent reliability, accuracy and long term stability
- Fast response time
- Fully calibrated flow measurement
- Autoclavable and disposable sensor solutions
- Customization for high volume applications

# Flow Sensors for Ventilation and Anesthesia

# Flow Sensors vs Differential Pressure Sensors

## Question 2

What light technology does our CO2 sensor and Particulate Matter sensor use?

Hint

-2 unique light technologies

# Sensirion Focus Applications

RH/T, VOC

Thermostats

Gas Flow, DP, RH/T

Portable Ventilators

RH/T, VOC, CO2

Demand Controlled Ventilation

RH/T, VOC, CO2, PM2.5

Data-Logger / Cold Chain

RH/T, VOC, PM2.5, CO2

Air Purifiers

RH/T, VOC, SDP

Appliances

RH/T, VOC, CO2

Smart Farming

New IoT Applications

# Thermostats –R/HT

Which Sensirion product fits best and why?

Customer Benefit	Enabled by	Our USPs
 Easy adaption to changing customer needs	  	Flexible SHT platform
 Best performance of your product (e.g. independent of self-heating by WiFi capability, large displays, etc.)		Temperature Compensation Engine
 Lowest Total Cost		Highest volume in the market One Stop Sensor Shop Versatile Solutions
 WYSIWYG What you see is what you get		We really fulfil our specifications We do 100% end test (a lot of competitors do neither)

# Thermostats – CO<sub>2</sub>

Which Sensirion product fits best and why?

Customer Benefit		Enabled by	Our USPs
	No customer complaints		Exceptional long term stability by dual channel design
	Lowest integration and product costs		Integrated RHT sensor
	Greater freedom of design		Small form factor (35x23.5x7 mm <sup>3</sup> )
	Enables use in battery driven devices		Low power consumption
	Highest performance for advanced HVAC control		Best price/performance ratio

# Demand Control Ventilation – Differential Pressure /Mass Flow

Which Sensirion product fits best and why?

Customer Benefit	Enabled by	USP
 No (re)calibration required	 	No drift, no offset (excellent repeatability)
 Highest energy efficiency and reduced emissions (minimized energy losses due to lowest pressure drops)		Highest accuracy at low flows enables precise control
 Lowest Total Cost		Economies of scale One Stop Sensor Shop
 No customer complaints and best customer experience		Return rate of < 50 ppm with multimillion sensors in the field

# Demand Control Ventilation – CO<sub>2</sub>

Which Sensirion product fits best and why?

Customer Benefit		Enabled by	USP
	Lowest product life time costs		Exceptional long term stability by dual channel design
	Lowest integration and product costs		Integrated RHT sensor
	Greater freedom of design		Small form factor (35x23.5x7 mm <sup>3</sup> )
	Enables use in battery driven devices		Low power consumption
	Highest performance for advanced HVAC control		Best price/performance ratio

# Refrigerators

Our humidity and temperature sensors increase energy efficiency and help to keep food fresh longer

- **Mullion heater control** (67%\* global market share): is used to avoid condensation. It is only switched on if humidity is high.
- **Compartment control:** Fruit, vegetables and meat need different humidity levels to stay fresh.

## Reason for Success

- High accuracy & long-term stability
- Tailor-made analog interface
- 1<sup>st</sup> class technical support

\*as per December 2017

# Air Purifiers / Humidifiers

**Our innovative sensor solutions extend product lifetime and increase accuracy**

- Air Purification: Removal of VOCs and particle matter to improve comfort and well-being
- Humidification (60% global market share for RH sensors\*): to stay in the comfort zone

## Reasons for Success

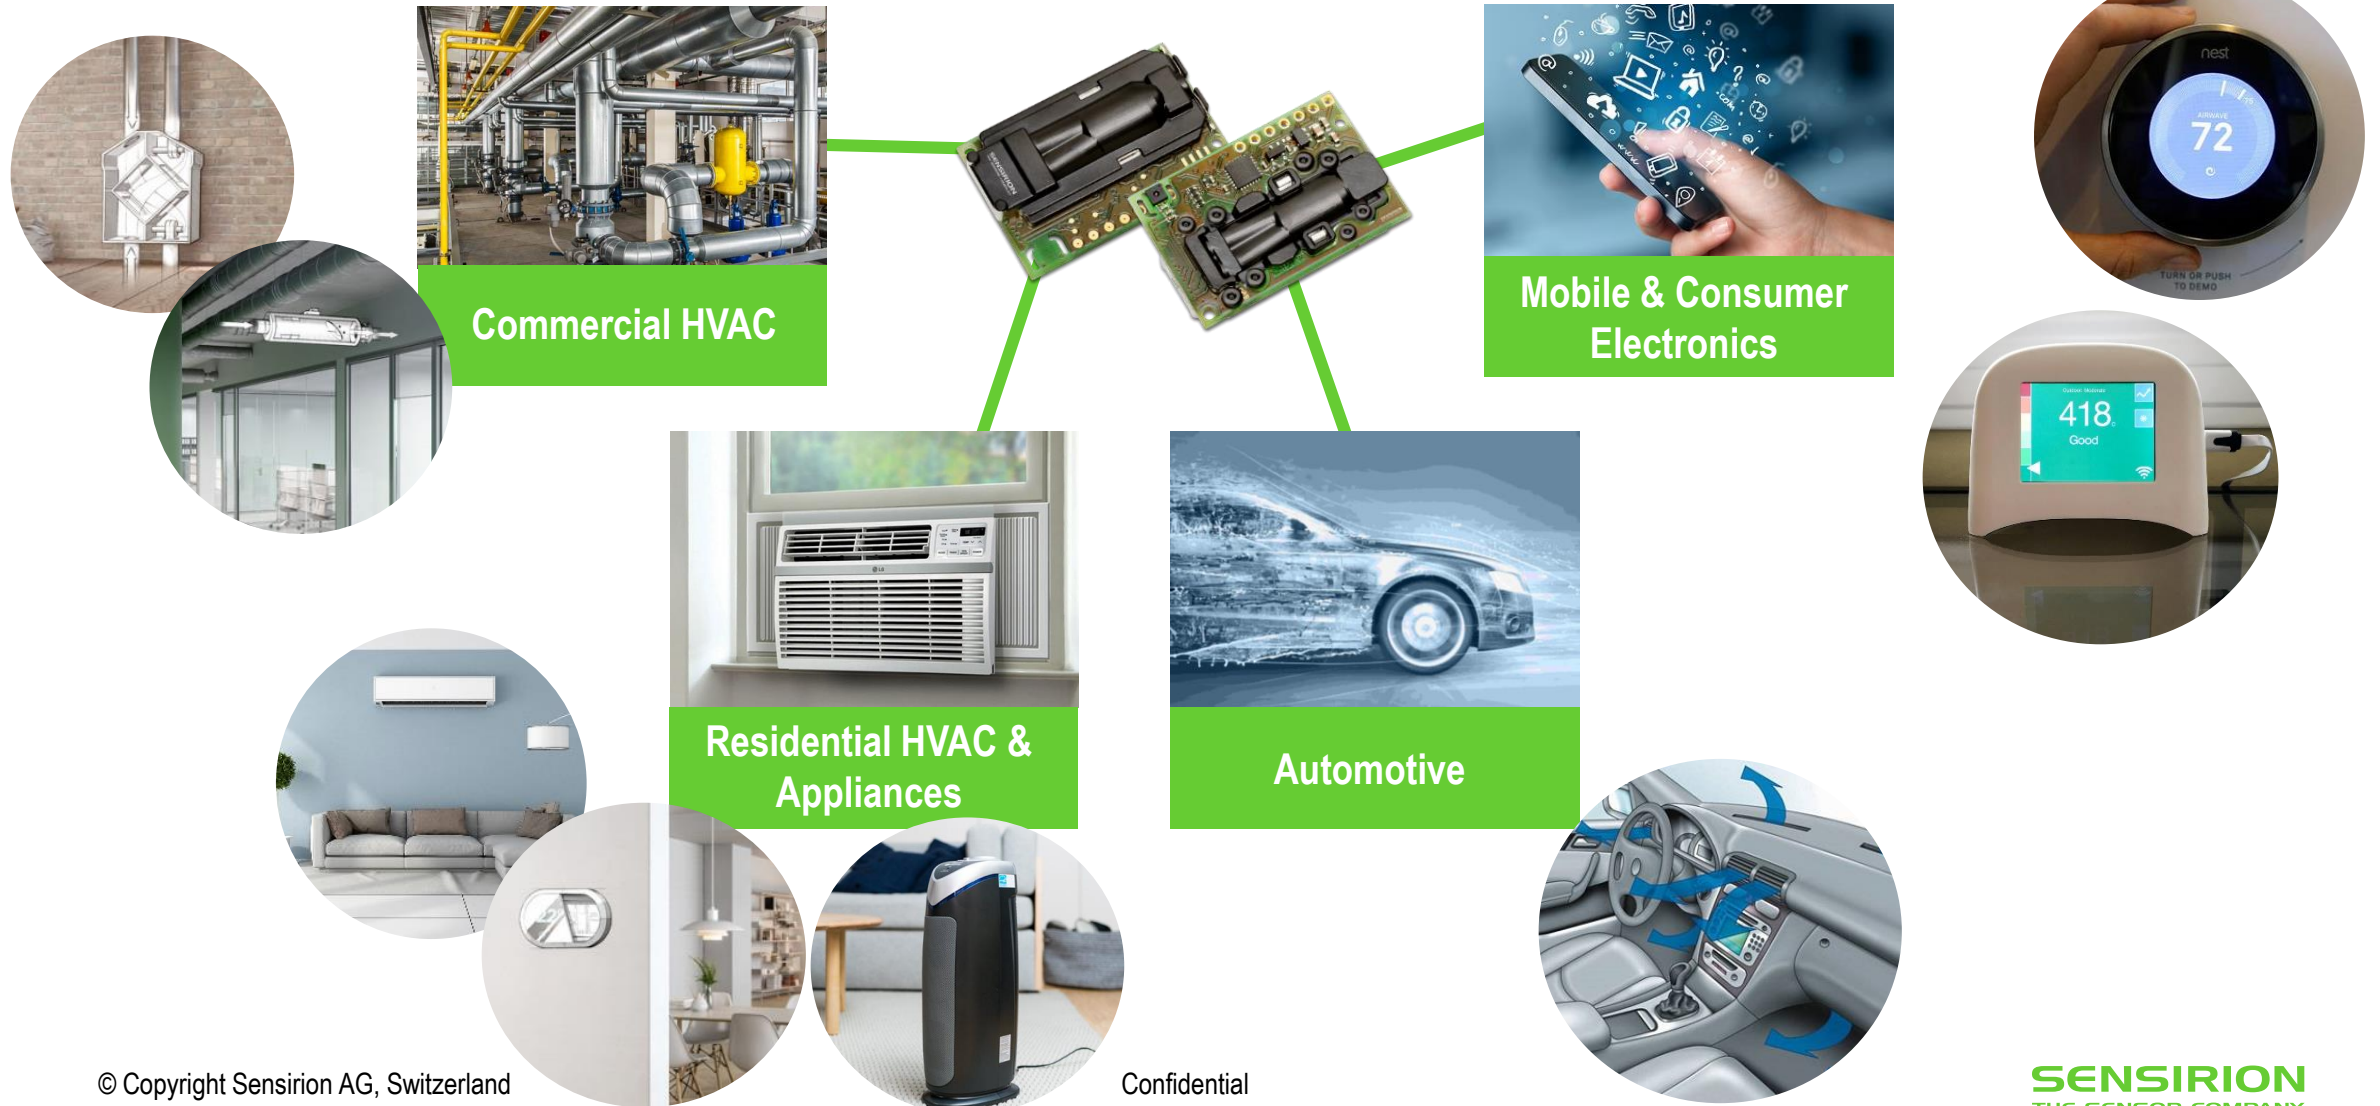

- IAQ sensor: excellent long-term stability thanks to siloxane resistance
- PM2.5 sensor: excellent long-term stability thanks to dust resistance
- Humidity & temperature sensor: best cost/performance ratio

\*as per December 2017

# Indoor CO<sub>2</sub> Sensing: Applications

# Medical Applications

CPAP

E-Health

Ventilation

Drug  
Delivery

Urine  
Flow

Anesthesia

# Ventilation & Anesthesia

**Our proven sensor solutions make intensive and home care ventilation applications safer, more reliable and more convenient**

- Patient centric ventilation in hospitals, homes and on the go with portable devices
- Precise anesthesia and gas mixing (CO<sub>2</sub>, N<sub>2</sub>O, Xenon, O<sub>2</sub>, Air)
- Broad portfolio of flow sensor solutions (adult, neonate, re-usable, single-use, proximal, expiratory, ...) provide easy to integrate solutions with a competitive advantage towards other technologies: No offset, no drift, readily calibrated, highly sensitive in all flow regimes and attractive volume pricing.

# Ventilation & CPAP

**Our leading air-flow solutions for CPAPs help treat sleep apnea**

- More than 10 million patients rely on our sensors every day and night
- Customer's peace of mind by using more than 10 years proven technology.
- 9 out of 10 customers choose Sensirion's sensor solution
- Patient's comfort by keeping device and patient's breathing synchronized

# Automotive Market - Key Applications

# Climate Control (Antifogging & Climate Control)

**Our humidity and temperature sensors optimize overall energy efficiency, safety and driver comfort**

- Enable prevention of windshield fogging
- Allow automatic control of the AC system
- Increase passenger comfort and reduce energy consumption
- Enables safe engine Start / Stop function

# Air Intake

**Our sensor solutions contribute to a reduction in fuel consumption**

- Better combustion control
- Fuel economy
- Reduction of NO<sub>x</sub> level
- Reduction of particle level (especially for diesel)

# Live Demos and Wrap up

## Question 3

What are 3 key applications that Sensirion is successful at ?

Hint

-industrial application , medical , automot
