**Subject:** RE: NKK Switches - New released announcement by EU-RoHS Directive

To Our Valued Representatives, Partners, and Customers:

We would like to extend our appreciation for your outstanding support and continued patronage.

In our ongoing pursuit of providing the best products, NKK Switches is dedicated to responding to changes in environmental regulations and maintaining compliance for our products. As new information is acquired, as a result of this pursuit, we will periodically update our lists and other environmental documents to reflect this new data.

In response to the newly revised EU-RoHS Directive regarding exemption 8(b), Cadmium in electrical contacts, NKK Switches of America has issued document CN-0357b as of 1/21/2020. CN-0357b contains the lists of part numbers affected by the new RoHS announcement.

As of today, the attached lists have been updated with the removal of switches with gold plated contacts from CN-0357b as they have been found to NOT contain Cadmium in electrical contacts.

CN-0357b (Rev 3) is a product list that contains Cadmium in the electrical contacts. All products in this list are affected by the new RoHS announcement.

We ask all distributors to update the RoHS statuses on their product lists according to the latest information.

We appreciate your efforts in this regard.

Sincerely  
NKK Switches
