TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

Improvement of Date Code for Power F Relays

Description of Changes

Dear customer, within our ongoing efforts to optimize our product portfolio throughout the lifecycle, we have made the decision to improve the readability of the datecodes and the traceability of the produced parts, we are going to introduce a standardization of the marking of all Power F (V23134) relays. We are going to implement a laser marking for the datecode for all power F relays. The new datecode will show the following format after implementation: ++JJWWDL with JJ=Year, WW=week, D=day (Saturday:1) and, S=Shift and L=Line. TE Connectivity Sales Team will answer your questions on any additional information or clarification that may be needed in that respect.

Reason for Changes:

Product improvement.
