

Information Letter Number: 220801**Date: 23/02/2022****Title:** SEN5x firmware update**Product Identification:** SEN54-SDN-T (3.000.535), SEK-SEN5x (3.000.670)**Reason for Change:** Design Production Logistics Manufacturing Location Quality/Reliability Upgrade**Change Description:**

The SEN5x sensor module features three different operating modes: idle, measurement, and RHT/Gas-Only Measurement.

Sensirion is introducing a new firmware version with the possibility of a direct switch between measurement mode and RHT/Gas-Only Measurement mode.

The new feature does not create any impact on the sensor's operation, and the new firmware version is fully backward compatible with the original version.

Identification Method to Distinguish Change:

Change in the firmware version, from v1.0 to v2.0.

Samples: available will be available in not applicable**Quantifiable Impact on Quality & Reliability:** none**Estimated Implementation Date*:** 15. March 2022

* The Estimated Implementation Date is the forecasted date that a customer may expect to receive changed product. This may be affected by fluctuations in supply and demand.
