# Industrial Ether Connectable IoT Sensor Hub

---

- **Overview**

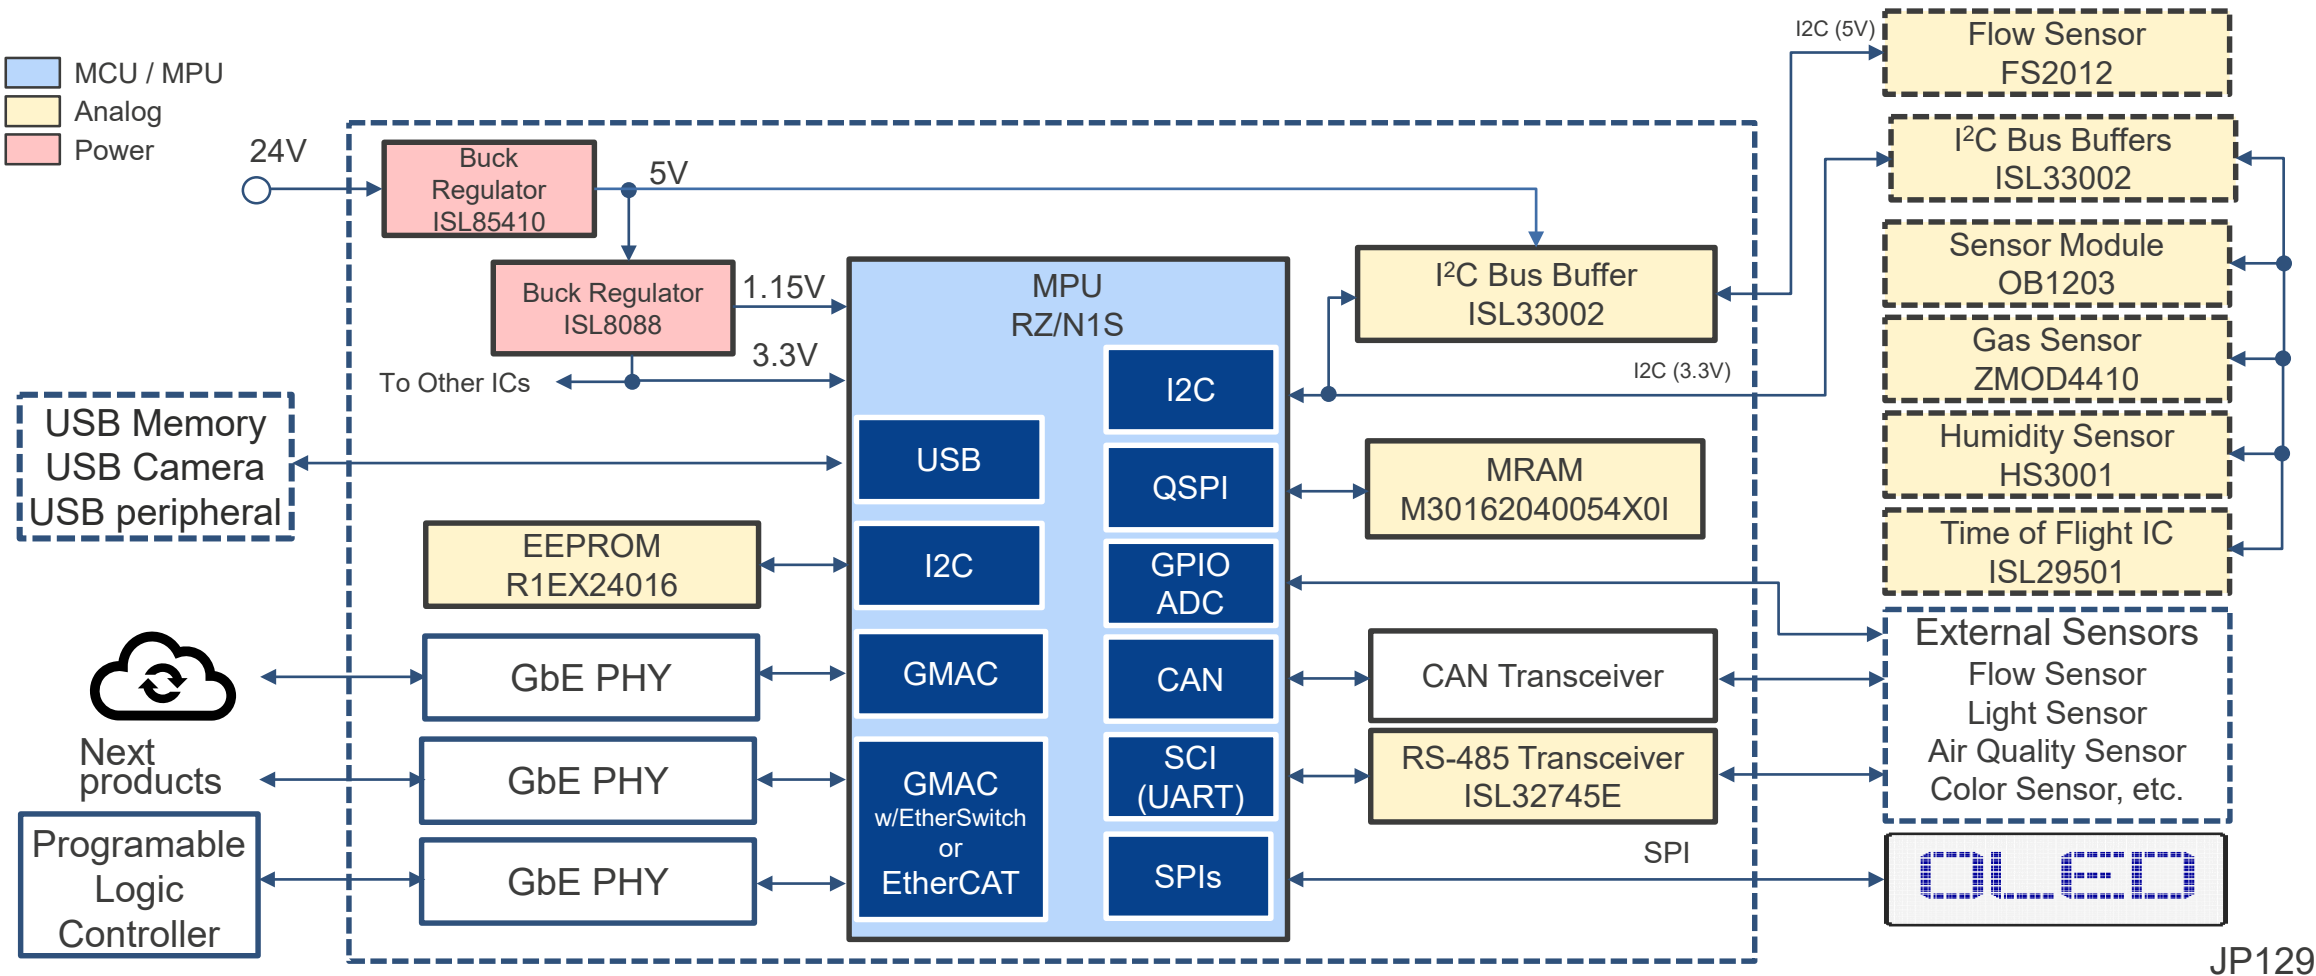

This reference design features an easy-to-build industrial ether connectable sensor hub solution that utilizes Renesas' RZ/N1S microprocessor (MPU), power products and sensors. The solution can collect data from sensors connected to the RZ/N1S MPU and send it to a programmable logic controller (PLC) and/or controllers, which comply with specific industrial ether protocols.

- **System Benefits**

- Send data to a PLC and/or controllers, complying with industrial ether protocols: EtherCAT, Ethernet/IP, PROFINET, Modbus-TCP, and OPC UA are all applicable for the solution, as well as IO-Link
- Sensors can be connected by several interfaces, such as CAN, RS-485 and I<sup>2</sup>C
- The RZ/N1S MPU has dual CPU cores: Arm® Cortex®-A7 and Arm® Cortex®-M3, so it can implement communication software on the Arm® Cortex®-M3 core and application software on Arm® Cortex®-A7 core separately
- The RZ/N1S MPU has features that help reduce bill-of-materials (BOM) and the size of the PCB
